Todo App Report

LINK: <https://razas-musis-player.netlify.app/>

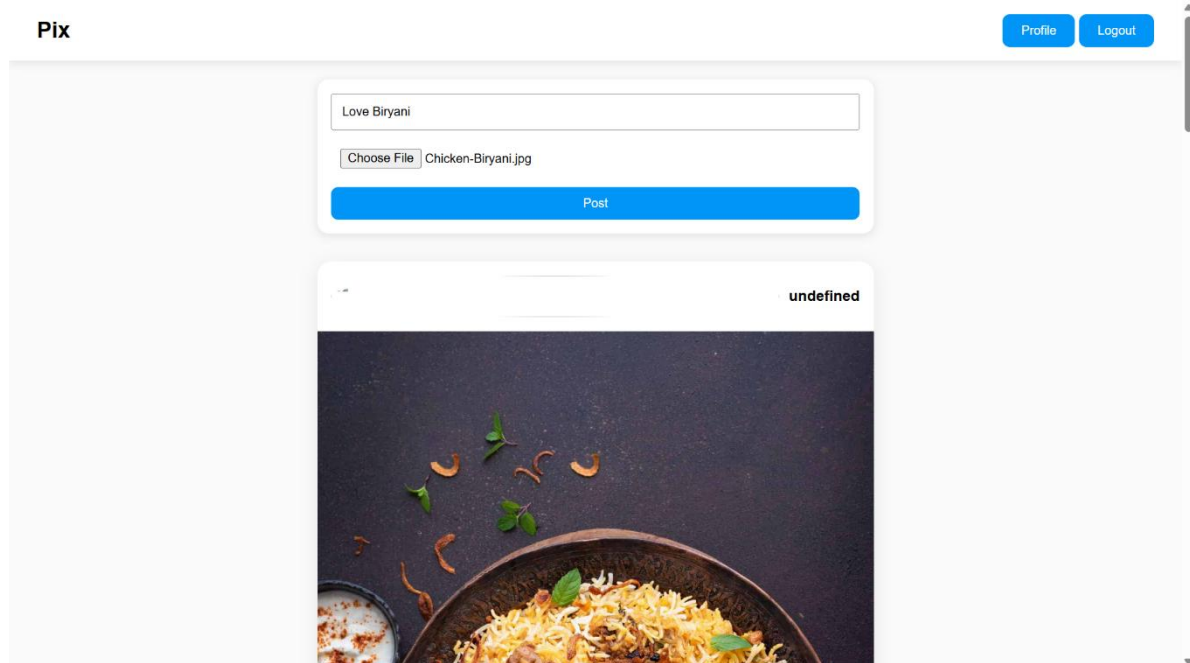

This is a simple music player web app built using HTML, CSS, and JavaScript. It allows users to play, pause, and switch between songs with basic controls and a progress bar. The app uses JavaScript for audio handling and UI interactions without any backend. It demonstrates core frontend concepts like DOM manipulation and media control.

Social Media App Report

LINK: <https://social-app-raza.netlify.app/>

This is a simple Instagram-like social media web app built using HTML, CSS, and JavaScript. It uses Local Storage to manage users, posts, likes, and comments without any backend. Users can log in, create posts with images, like and comment on posts, and view a profile page with a grid layout. It demonstrates basic social media func

tionality in a frontend-only project.
